EXPERIENCE

Senior iOS Developer
TradingView

02/2024 – 07/2026 **Tbilisi, Georgia**

Social trading network, financial analysis platform, and mobile app for traders and investors

- Engineered graphics-heavy features and redesigned legacy graphics components, achieving a ~20% performance boost in profiling benchmarks
- In-App Purchase Infrastructure Overhaul (StoreKit 2 Upgrade)
- Redesigned legacy architecture to decouple components, significantly improving task predictability and accelerating feature delivery by up to several weeks.
- Streamlined QA communication and cross-team workflows, increasing team productivity by ~50%
- Cut project rebuild times by refining dependency management, returning **~6 hours monthly** to each developer (nearly 2 workweeks per year).

iOS Tech Lead
Wimix LLC

06/2017 – 01/2024 **Minsk, Belarus**

Outsourcing software development

- Led architecture, feature development, and legacy code refactoring. Collaborated with cross-functional teams to optimize technical requirements, provide guidance, and automate development workflows
- Established collaboration with HR, which significantly simplified the hiring process. Gathering information about a candidate's actual skills and performance was simplified. This allowed us to secure specialists who would otherwise be ignored by many IT companies, but who possess outstanding skills
- Streamlined the candidate evaluation process to better screen out candidates with strong interview prep but weak technical execution
- Led technical decisions, mentored junior engineers, and drove cross-team alignment

SKILLS

Skills

- **Worked deeply with Swift, SwiftUI, UIKit, TCA, and modern concurrency**
- **I drive product excellence by leading complex feature development, optimizing system performance at scale, and owning core architecture end-to-end**
- **I combine technical depth with business strategy to optimize engineering costs and accelerate conversion growth**
- **I thrive in ambiguity—solving open-ended problems is far more engaging than simple task execution**
- **Leverage modern AI workflows to accelerate delivery:**
- **Claude Code for terminal-driven agentic development and CLI automation**
- **Gemini & Perplexity for technical research, architecture exploration, and documentation refinement**

Apple Tech Stack

- **UIKit, CoreGraphics, CoreAnimation, SwiftUI, Combine, CoreData, SwiftData, Contacts, MapKit, CoreLocation. StoreKit, StoreKit 2, Swift Charts, Quartz, CoreImage, Metal, AVFoundation, CallKit, PencilKit, Compression, CryptoKit, CoreML, simd, AppKit, User Notifications (APNs), PassKit, Keychain**
- **XCTest, Testing, Xcode Cloud**

EXPERIENCE

Team Lead iOS Developer

Squared Financial

08/2022 - 08/2024 **Minsk, Belarus**

Mobile trading platform for Crypto, Forex, and multi-asset markets with seamless MT5 integration

- Spearheaded the migration from legacy MT4 to MT5 trading infrastructure
- Engineered high-performance graphics components for rendering real-time financial charts.
- Refactored and migrated legacy Objective-C components to Swift

Senior Flutter Developer

XBO

05/2020 - 08/2022 **Minsk, Belarus**

Multi-asset trading platform for Web, Desktop, and Mobile. (Crypto, Forex, etc.)

- Transitioned core state management from Cubit to BLoC, enhancing architectural scalability and decoupling business logic from UI components.
- Developed custom native iOS plugins to bridge cross-platform code with deep platform-specific APIs and system functionalities.

Team Lead iOS Developer

TalkWorks

10/2018 - 05/2020 **Minsk, Belarus**

Find therapists and book online video consultations instantly

- Architected end-to-end in-app subscription integration using StoreKit, streamlining purchase pathways and handling automated renewal lifecycles.
- Architected a scalable internal chat feature from scratch
- Engineered robust video calling capabilities using WebRTC and CallKit, ensuring seamless real-time communication and native iOS calling integration.
- Engineered Python-based code generation scripts to automate backend API integration and networking layer setup.

SKILLS

Other Tech Stack

- **Mobile & Client SDKs: RxSwift, Firebase, Realm / MongoDB, Google Analytics, WebRTC, Alamofire, Moya, Twilio, SQLite, SnapKit, Google Mobile Ads SDK**
- **Server Frameworks: grpc-swift-2, Hummingbird**
- **Technologies: Protobuf, gRPC, OpenAPI (Swagger), GraphQL**
- **CI/CD: GitHub Actions, Xcode Cloud, Fastlane, Jenkins**
- **Dependency Management: SwiftPM (Swift Package Manager), CocoaPods, Carthage, Tuist**
- **Version Control System: Git, Mercurial**

Architecture Patterns and Methodologies

- **SOLID, KISS, DRY**
- **MVC, MVP, MVVM, VIPER, TCA, Coordinator navigation (MVVM-C)**
- **Test-Driven Development (TDD), Domain-Driven Design (DDD)**
- **Command Query Responsibility Segregation (CQRS)**

Tools and Frameworks

- **Xcode: iOS and macOS development**
- **Zed: Python scripting and task automation**
- **VS Code: PlantUML modeling**
- **Claude Code: Automated code reviews, Terminal-driven agentic development, rapid MVP builds, and CLI automation**
- **Gemini & Perplexity: Technical research, architecture exploration, and text refinement**

EXPERIENCE

Senior iOS Developer

Mobicon Media

09/2014 - 01/2017 **Minsk, Belarus**

Mobile banking app from ASB Belarusbank for managing cards, paying bills, and making transfers

- Optimized core calculation algorithms and resolved critical UI performance bottlenecks, reducing lag and improving responsiveness
- Redesigned cross-platform Core architecture (iOS, Android, Server-side) to enforce immutability, eliminating data mutation bugs (20–25% of all issues). Enhanced application stability by isolating unmanaged C++ wrappers and spearheaded a new UI design system overhaul
- Streamlined team communication and cross-functional workflows

EDUCATION

Bachelor's Degree, Electrical and Electronics Engineering

Yanka Kupala State University of Grodno

2008 - 2013

LANGUAGES

Russian - Native
English - B2
Polish - C1

SKILLS

Programming Languages

- **Swift, Objective-C/CPP for iOS, macOS, and Server-side**
- **Java, Kotlin, Dart for Android and Multiplatform**
- **Python, Shell for CI/CD and automation**
- **GLSL, HLSL, Metal Shading Language**

MY OPEN-SOURCE PROJECTS

PhotoEditor

https://github.com/vitali-kurlovich/PhotoEditor

An iOS/macOS photo-editing app for iOS that offers a curated collection of high-quality, cinematic filter presets using LUT (Look-Up Table) based color grading. The same professional technique used in film and photography for a rich, editorial aesthetic distinct from typical vintage/nostalgic filter apps.

Tech Stack: SwiftUI, Core Image, Metal, PhotoKit

SwiftSVG

https://github.com/vitali-kurlovich/swift-svg

A Swift package for parsing, rendering, and converting SVG images.

Tech Stack: Swift, SwiftUI, CoreGraphics

MY OPEN-SOURCE PROJECTS

Swift Data Structures

https://github.com/vitali-kurlovich/swift-data-structures

A Swift package implementing essential data structures and algorithms, including LinkedList, LRU Cache, BloomFilter, and a Random Number Generator.

Tech Stack: Swift

WebRTC

https://github.com/vitali-kurlovich/webrtc

Features CI/CD automation to patch and build the WebRTC library directly from official Chromium source code.

Tech Stack: Swift, Python, Shell, GitHub Actions

Semantic Versioning

https://github.com/vitali-kurlovich/swift-semver

Parses, Formatting and validates Semantic Versioning specifications in Swift.

Tech Stack: Swift, AttributedString, Regex

FreeDistort Warp

https://github.com/vitali-kurlovich/swift-image

A SwiftUI modifier for applying a Free Distort Warp effect to SwiftUI views.

Tech Stack: Swift, Metal Shading Language, SwiftUI

MathKit

https://github.com/vitali-kurlovich/swift-mathkit

A Swift package containing generic linear algebra primitives alongside essential algorithms for matrix and vector computations on Apple platforms and Linux.

Tech Stack: Swift, simd
